

Piping Nozzle, Tip, Tube Comparison Table
By Ceri DD Griffiths

Please be aware that the comparisons shown below are from my own personal experience and compiled using my own collection of piping nozzles, tips and tubes. Note also that the same number from different makers does not necessarily compare, which is the purpose of this whole exercise. Only the Wilton numbers are in numerical order. This is meant only as a guide and not definitive. This was last updated 1st January 2013; I hope you find it useful.

Numerically close does not necessarily mean similar in shape or size
